50X1-HUM

1. It has been reported that the Bulgarian railroads are using Soviet coal although the amount supplied by the USSR is sufficient only to assist in running these services. It is not explained why Bulgaria is using Soviet coal since sufficient coal for domestic consumption is mined principally at Maritsa, Pernik and Ichtiman.
2. It is also reported that the Soviet Union is taking large quantities of charcoal from Bulgaria. This comes mainly from Peshtera and Krichim and is transported by railroad to Burgas and Varna for shipment to Russia.
